

Francisco Navarro

FRONT-END DEVELOPER

About

I'm a seasoned Front-End Developer with 4 years of focused experience in React and Angular frameworks, complemented by proficiency in Next, among other technologies. Additionally, I excel in crafting cross-platform mobile applications using Ionic and Capacitor.

My skill set extends to Back-End development with Laravel, underpinning my ability to deliver comprehensive solutions. Plus I'm passionate about creating intuitive and compelling user interfaces and possess a strong foundation in UI/UX design and a mastery of CSS.

I am committed to collaborative efforts, recognising that my professional success hinges on contributing effectively to my team and organisation, and my goal is to consistently align my work with our collective objectives, fostering a positive and productive work environment.

Experience

Front-End Web Developer

ESAIL IT SOLUTIONS | November 2023 - July 2024

At ESAIL IT Solutions, I led the Front-End team, focusing primarily on projects developed with Angular. My responsibilities included overseeing the quality control of my team's code and ensuring it met high standards. I implemented new work methodologies and technologies to enhance productivity and foster a collaborative work culture, with a strong emphasis on Kanban for organisational efficiency. Additionally, I was involved in onboarding and training new team members, ensuring they integrated smoothly and developed the necessary skills. I also contributed to project analysis, playing a vital role in the strategic planning and execution of our development projects.

Front-End Web Developer

Kubide | May 2023 - November 2023

At Kubide, I focused on developing cross-platform applications using Ionic Angular and contributed to projects in Next.js (React). Organised under the SCRUM agile methodology, I played a key role in performance optimisation and enhancing solutions, with a particular emphasis on improving user interfaces and overall user experience.

Full-Stack Web Developer

ESAIL IT SOLUTIONS | December 2020 - May 2023

In my first role at ESAIL IT Solutions, I developed solutions primarily using Angular and Ionic, handling projects from initial analysis through to final documentation, within a Kanban-driven workflow. I also initiated and developed internal projects in React. My responsibilities included direct client communication, onboarding and training new team members, and promoting the adoption of new technologies and best practices.
